Muddy Creek Cutting on the Rail Trail

The farmhouse has been cheerfully modernized, has 5 double bedrooms (2 have an extra single bed), 2 bathrooms and a large electric sauna. The water supply is treated and a solar power system provides some of the energy. There are open fires .

Set in a cluster of trees, near a pond,raised up in its surrounds, its a park-like setting with exceptional 360-degree views out into surrounding farmlands, hills and mountains.
On 10acres we farm 5 milking sheep and their progeny, make cheeses, grow vegetables , chickens, ducks, peacocks and bees .
The house is full of artworks, paintings and printed fabrics, made here and inspired by this local environment.

A rural experience, ideal stopover while cycling on the Rail Trail,and for discerning foodie tourists, looking for something unique. This experience will enchant you and be memorable.
